## Universal Pitot Static Adapter Kit

---

---

The UPSA Kit comes with two Pitot adapters and two Static adapters. Each Static adapter has articulating arms with suction cups that use a vacuum supply to firmly mount the adapter to the aircraft body. The vacuum supply for the suction cups is provided by a vacuum pump that runs on universal AC power with an internal battery backup. The vacuum supply can also be provided by a simple hand-pump when power is not available. The versatility of this system makes it extremely easy to reliably connect to an aircraft's Pitot Static system.

---

### Key Features

- Lightweight, Portable, fits in aircraft's overhead bin.
- Runs on universal AC power, with internal battery backup and built-in charger
- Built-in hand pump for providing vacuum supply when power not available
- Two Static adapter plates with fully articulating arms
- Soft vinyl suction cups (20-30 duro)
- Fully functional in either single or dual static port configuration
- Two Pitot adapters made from pure gum rubber
- 50 cubic inch vacuum chamber for vacuum supply to suction cups
- Automatic vacuum-fill monitor with one-touch vacuum-fill
- Visual and audible warning of low-vacuum
- Visual and audible warning of loss of AC power
- Operating Power : 90-260 VAC, 47-63 Hz, 60 VA
- Operating Temperature: -25°C to 50°C
- Storage temperature : -25°C to 75°C
- Weight : 11 lbs
- Dimensions : 19.6" x 9.4" x 8.9"
